

Electry

CONTRACT OPTIONS:

#1 -YOU OWN IT \$

This is our traditional pay-upfront option, where you purchase the EV charger and cover the installation costs and permitting, ensuring complete ownership and control.

#2 - SHARED COST & PROFIT

A shared cost and profit model, where we install the charger at half the usual price. In return, we retain 90% of the energy revenue generated by the charger, providing a costeffective solution for those looking to enter the EV market with lower upfront investment.

Choose the model that best fits your business strategy and join us in driving the future of sustainable transportation!
